

instructions

1.

Install Pd-extended in your O.S. >>

<https://puredata.info/downloads/pd-extended>

OR

<https://sourceforge.net/projects/pure-data/files/pd-extended/0.43.4/>

OR

https://sourceforge.net/projects/pure-data/?source=typ_redirect

2.

Once Pd-extended is installed download those packages depending the version :

<http://eixams.cc/code/EixamsHiveBasicSonification.zip>

3.

Search the file
EixamsHiveBasicSonification.pd
which is contained within package you already have downloaded in step 2

4.

Open EixamsHiveBasicSonification.pd with pd-extended (right button open with Pd-extended)

or

Alternative way

//////////

By terminal:

Open a shell and type 'cd' until PrOHPollium Directory depending where you saved it.

For example

cd /home/xa/Desktop/EixamsHiveBasicSonification

in case you downloaded the packaged in Desktop

type

pd-extended EixamsHiveBasicSonification.pd

and the application will run it generatively.
